1 About

We are a cross-university research lab (Dartmouth College, University of Pennsylvania and Stanford University). The lab exists to serve as a nexus for work on affective polarization, social trust, and political violence.

Our lab focuses on addressing the following critical questions:

- What are the principal causes of affective polarization and what can be done to treat it?
- When and where does affective polarization alter behavior? Why?
- How effective and durable are approaches to reducing affective polarization?

2 Affect

Question label: democrat_therm_1

Question text: “We’d like you to rate how you feel towards some groups on a scale of 0 to 100. Zero means very unfavorable and 100 means very favorable. Fifty means you do not feel favorable or unfavorable.

How would you rate your feeling toward Democrats?”

Question label: violence4

Question text: "{name 4} was convicted of arson.

He was arrested by police as he attempted to run from a fire he started at the local {outparty: Democratic/Republican} headquarters. Although he waited for the building to close for the night, several adjacent buildings were still occupied.

Do you support or oppose {name 4}s actions?"
