Title: ABC News Poll: National Election Day Exit Poll

Survey Organizations: ABC News

Field Dates: November 6, 1984

Sample: Exiting Voters

Sample Size: 20637

Sample Notes: Includes oversamples from 14 states. See documentation for details. Select '1' from column 52 to get national sample.

Interview Modes: Mail questionnaire/Self-enumerated questionnaire

Weight Location: None

Usage Notes: The Code '0' (zero) was used for two separate occasions. (1) It was used if a respondent did not answer a question at all. (2) It was used if they did not check off a multiple response question. It will be evident if a respondent failed to turn over the questionnaire because he/she will have all zeros across the board starting with question L.

Please note that data provided by the Roper Center for Public Opinion Research may not be re-disseminated without written permission. The results of any analyses conducted on the data may, however, be published with appropriate acknowledgments and source citation.

There is NO WEIGHT

The number of sampling locations in each state was determined by a formula developed at ABC. Example: If CA had 10% of the U. S. Population and 30 sample points were judged feasible then states with 5% of the population would have 15 sample points.

The unusual number of "0" punches in each column refers to "blanks." This poll was different from the others in that an optical scanner was used thus translating some blanks as "0"s.

When using oversampled states combine the oversample with the National sample, or do not select for sample at all, just select the state(s).
