Project for Excellence in Journalism
2010 News Coverage Index Coding Data
January 1 - December 31, 2010
N = 52,614

In the attached SPSS file, all variables have been given their correct labels except for two variables - BIGSTORY and SUBSTORYLINE. The labels for these variables are listed in the attached codebook.
We make every effort to make sure our data is accurate. But in some cases, lead newsmakers who appeared in less than 10 stories may have small discrepancies relating to the spelling and structure of their names.
